

1. Install the QDEX App from the Google Play store, on your android phone. Apple will not be available for 45 days or so.

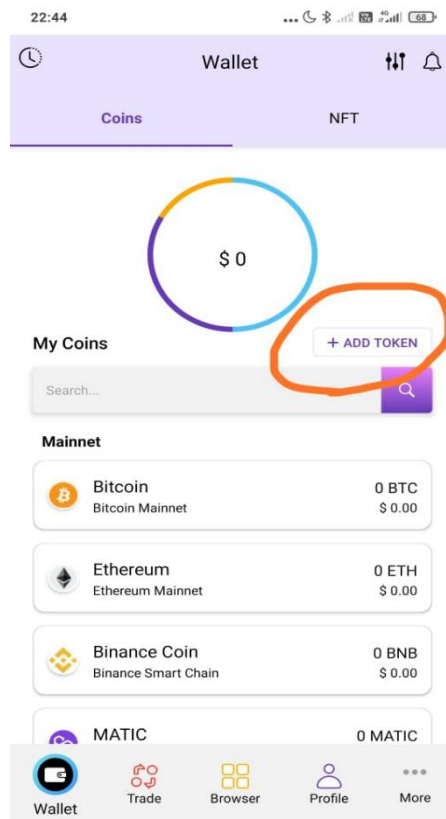

<https://play.google.com/store/apps/details?id=com.qdex>

2. You need to go through the entire process including the creation of your mnemonic phrase.

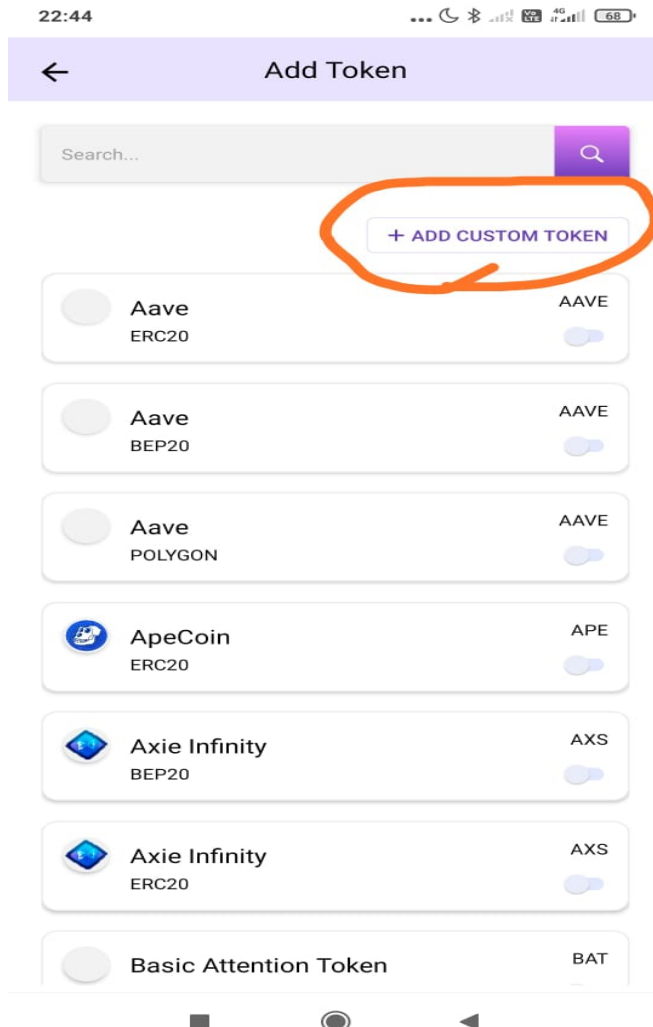

This is a set of 12 words, YOU MUST SAVE SOMEWHERE, that is both safe and that you will not lose. Should anything happen to your “Wallet”, it can ONLY be recovered, if you have this phrase. You must also know the correct order in which it is typed of in. You will see when you create the wallet.

3. Once inside and the wallet is up and running, then we must add specific additional wallets for KRY and QDEX Utilities.

4. Open Qdex Wallet and click on add token

5. Click on Add Custom Token

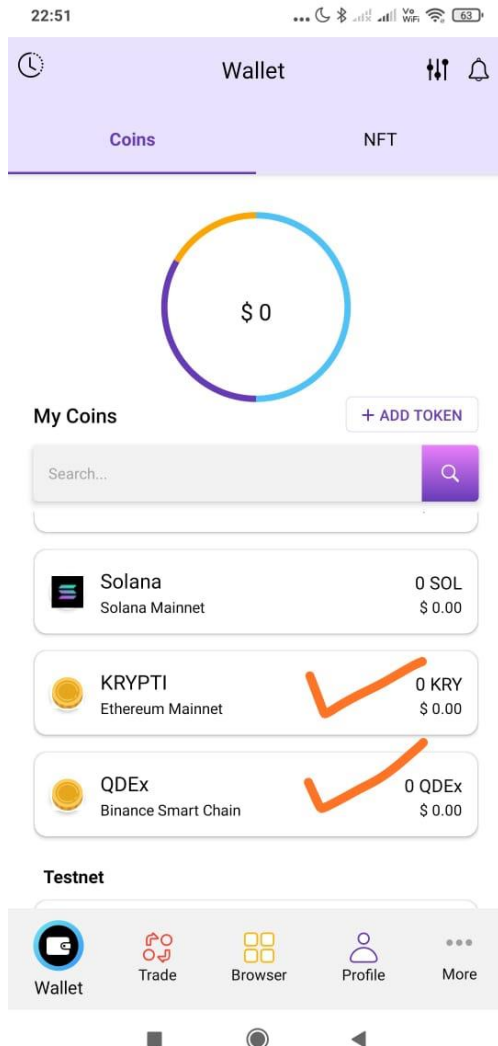

6. On your device, ANDROID TABLET or ANDROID PHONE, paste the address of Krypti Token in the contract address field. You must then wait for few seconds then click confirm.

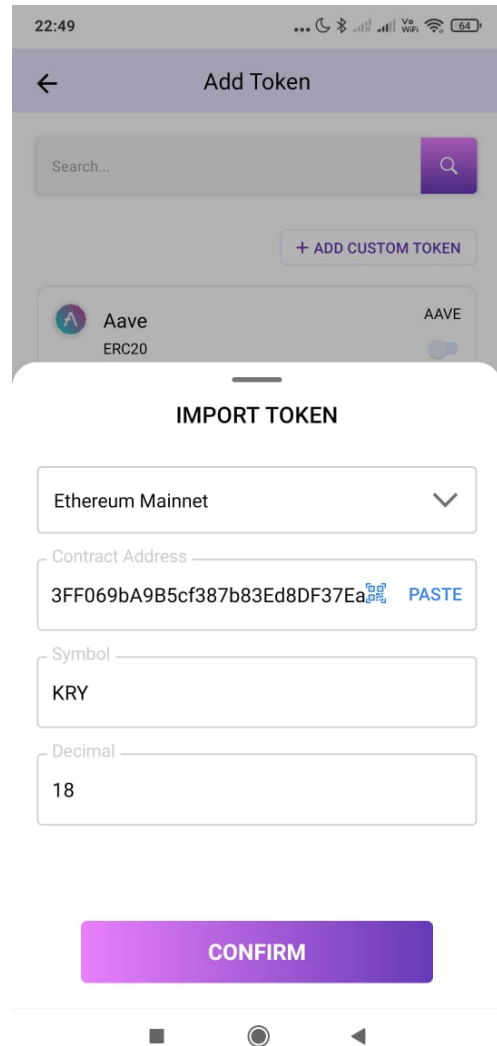

0x07Ef0fe8CCdE3FF069bA9B5cf387b83Ed8DF37Ea

Please leave the token type as Ethereum Mainnet.

It is critical you copy and past EXACTLY or you can lose all your tokens.

4.
7.

7. Repeat Step 3 but this time choose “Binance Smart chain” from drop down and paste the Qdex Utility token address –

0x121583157465dA42356029406574E364Eaa890C0

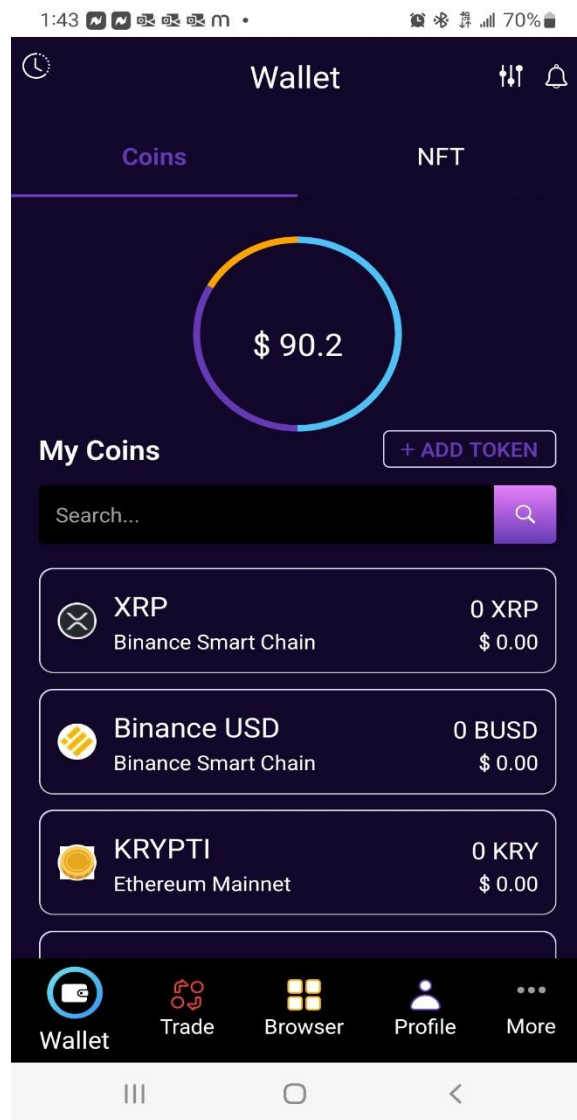

8. If you desire to hold your KRY and QDEX Utilities yourself, go to www.wearegvv.io and enter in your wallet addresses.

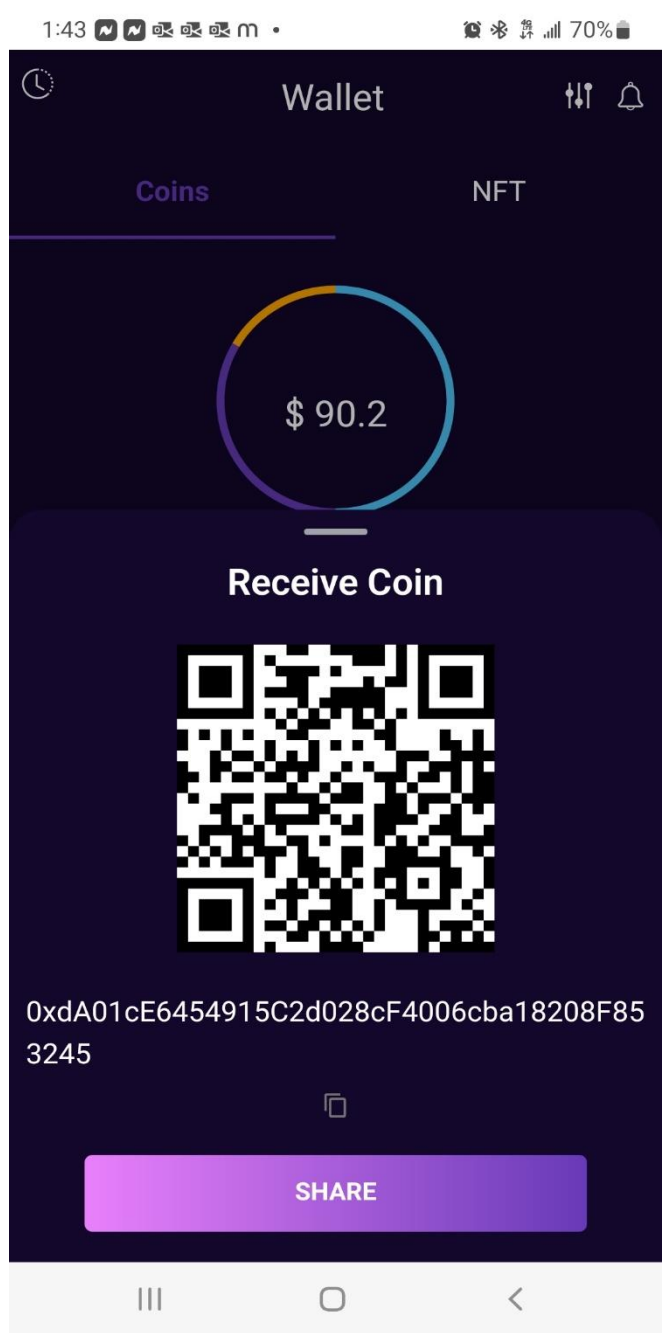

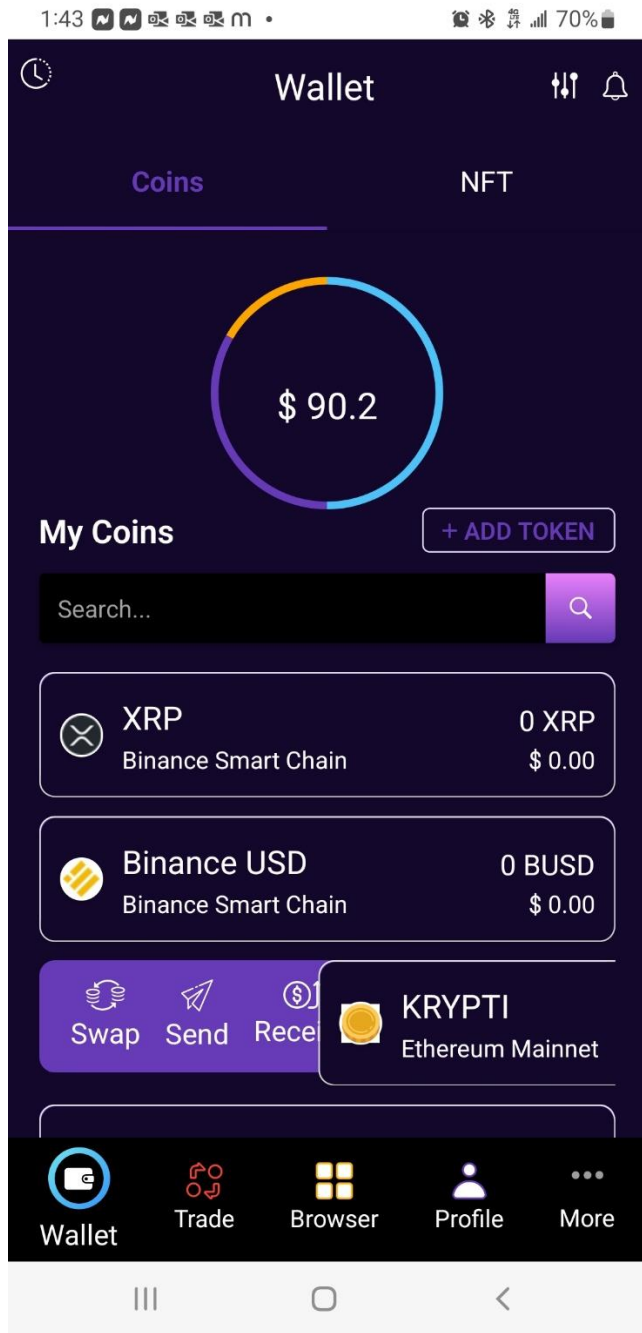

Help regarding your Wallet Addresses:

1. Open the QDEX Application to the home screen. Scroll down first to the Krypti tab. Then slide it to the right and click on Receive.

At that time, an address will be displayed. This is the exact address to enter into the Wearegvv.io website into the Krypti Wallet address location.

You can press, hold, and copy the wallet address, or you can share it with yourself.

END
